

Refrigerants, Naturally!

for LIFE

SUSTAINABLE COOLING FOR EUROPE'S SMALL FOOD RETAIL SECTOR

Climate action in the small food retail sector, including the use of natural refrigerants and energy efficient cooling and heating equipment, is inevitable to make Europe climate-neutral by 2050.

That's why eight partners from five European countries have joined forces in the RefNat4LIFE project.

Our aim:

To significantly reduce emissions in small food retail and accelerate the transition to natural refrigerants.

The right choice of cooling equipment

We provide information on energy-efficient, climate friendly cooling and heating technologies using natural refrigerants to:

End-users of refrigeration equipment in the organic and small food retail sector

The **contracting and servicing sector** for refrigeration, air-conditioning and heat pump equipment

How sustainable is your cooling & heating system?

Check out the free RefNat4LIFE tools:

E-Learning

Access our free, self-paced **online training courses & webinars** for store owners and RACHP technicians

Training course database for RACHP contracting and servicing companies

Which natural refrigerant would you like to learn more about? Find the training course you need in our **training course provider database** for technicians

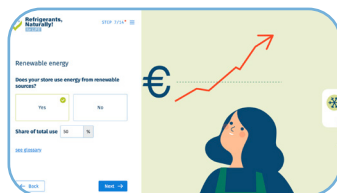

Guidance documents and case studies

Find out about the policy framework and technical options and download our **guidance documents and checklists**. Our **case studies** give good examples of small stores that have already successfully converted to natural refrigerants.

Criteria & benchmark tool

Our **criteria & benchmark tool** allows store owners to quantify their store's emissions and identify potential savings.

When you are looking for new RACHP equipment for a store, use our **product finder** to find sustainable solutions

Get involved!

Want to actively support natural refrigerants? The non-profit association Refrigerants Naturally! welcomes active participation from: organisations and individuals, food retailers, contracting and servicing companies, system and component suppliers, NGOs, associations, political decision makers, and others.
